TO WHOMSOEVER IT MAY CONCERN

This is to certify that Miss. Sukanya aged 34 Y/F with UHID: 240232534 was brought to ER on 05-02-2025 with alleged history of reduced response since 1 day and attender also gives history of stiff extremities and bladder incontinence. She was initially taken to nearby nursing home where she was treated but during her stay they noticed no improvement in her condition and hence she was shifted here for further management. Patient was intubated in view of low GCS. CT Brain showed large intraparenchymal hematoma in the left parietal and temporal parenchyma with intraventricular extension, disproportionate perilesional edema and midline shift to left by 1.2 cm. Attenders were counselled regarding the need for surgery. Patient underwent left parietotemporal decompressive craniectomy and evacuation of haematoma done on 05-02-2025. Post operatively patient was managed in the intensive care on ventilator support. Psychiatrist opinion was sought and advise followed. She developed fever spikes for which culture and sensitivity was sent and antibiotics were escalated. She underwent tracheostomy on 08-02-2025. Her GCS improved to E3M5Vt with right hemiplegic. On and off CPAP trial was given to wean off the ventilatory support but she was not tolerating well. As tracheostomy tube was displaced from trachea on 12-02-2025, she has been re intubated and connected to mechanical ventilator. Plan is to re institute tracheostomy. At present she is sedated and paralysed on 100% A/C PRVC mode. This is for your information.
